

HVAC Rental Units (ATEX)

We Offer Portable Air Conditioning Units for rent that are designed and constructed for use in hazardous, explosive atmospheres (Zone 1, Zone 2) within the Oil & Gas, Offshore Marine and Petrochemical industries. This ATEX compliant unit consists of ATEX and IECEx dual certified electrical components and is primarily designed to be a portable solution for temporary cooling requirements.

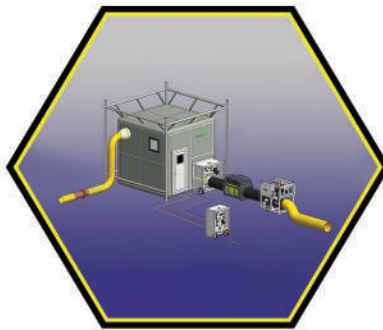

Hazardous Area Planned or Emergency Standby Rental Systems

Whatever type of oil, gas or petrochemical facility or application, Magnus Energy Services can develop a solution to your temporary or long-term hazardous area climate control requirements. Magnus Energy Services helps our customers increase profits by creating opportunities, solving problems and reducing risk using our unique equipment and technical services.
